ConnectTheDots SOLUTIONS

Business Process Automation (BPA)

Business process automation uses **technology and software to automate and streamline business processes, eliminating manual tasks and reducing human intervention.**

This service offers customizable, business process automation solutions tailored to a company's needs by documenting their current processes, finding the inefficiencies, and **implementing the solutions without charging the business anything upfront.**

Questions to explore...

- Are there aspects of the business that are currently run out of Excel, Email, and/or Calendar Reminders?
- Does your company manually enter the same data into multiple systems?
- How do you currently assign and/or track the status of operational tasks?
- Are there bottlenecks in your operations that keep you up at night?
- Are there areas of your business that you know you could automate but haven't had the time or resources to do so?
